

FIRE AND SECURITY RECRUITMENT

peeltechnical

Who are Peel Tech?

Peel Technical are a Niche Engineering recruitment agency that specialises in acquisition of technical staff across the Fire And Security market. We have a thorough understanding of what it takes to find the right person for any position in the industry, our team has the experience to fill the vacancies that are causing your headaches whilst offering help and advice along the way. We can help in providing candidates on a permanent, contract or temporary basis across the UK and Ireland.

AREAS WE COVER:

Sprinkler Systems - We cover all areas of Sprinklers from design, installation, service and maintenance, the project management of small and major projects to senior level. Our team have a strong understanding of all different types of fire suppression systems, sourcing candidates from across the European and UK market that specialise in, mechanical sprinklers, alternative sprinklers, foam suppression, water mists and Gaseous extinguishing systems. Our internal team not only source some of the best talents in the market they also help with any industry market queries, from salaries, market structure, and recruitment process.

Fire Alarms / PFX - At Peel Technical we offer an efficient service in providing some of the best fire alarms, emergency lighting and PFX engineers that are on the market. We understand the market and ensure that when we find the right engineers with the right experience for your company, ensuring that they have practical experience working with specific systems and software such as Gent, Notifier, Protec, Morley, C-Tec, Kentec, Ziton, or are BAFE or FETA registered.

Security - With the UK being in the top 4 in the world for CCTV surveillance with north of 5 Million cameras across the UK, the team at Peel Technical work closely with engineers from install and commissioning to service and maintenance up to senior management, with a similar process to our fire alarm and sprinkler system recruitment we work with our clients understanding what the requirements are to best fit their companies, whether that be qualified to certain standards of working on particular software such as Hikvision, Dahua, Bosch, Generic Analogue Systems. As a company, we also cover all aspects of access control and intruder alarms.

MEET THE FIRE AND SECURITY TEAM

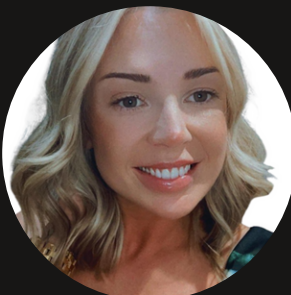

DANIEL AUSTIN

OUR RECRUITMENT PROCESS

Identify Recruitment Needs

We take the time to understand the needs of your business, working collaboratively with you to understand exactly what the right candidate needs in respect of experience, values and professionalism.

Recruitment Plan

At Peel, we set out a clear plan to ensure we understand all aspects of what your company opportunities, we grasp all details of the job specification, discuss the salary bandwidth and location of works to understand if its fixed to office/Hybrid/Remote.

Sourcing

We dedicate our time to source the best candidates available on the market across multiple platforms adding them to our talent pool. We source from multiple job boards, job posting, head hunting, private candidate groups, open days and other resources. Following this we screen the candidate and have a detailed phone/teams conversation regarding all experience, locations willing to travel, salary & package expectations to see if they are the correct candidate for your business.

Shortlist

Once we believe we have the right candidates for your companies requirements, we will produce our formatted CV's with all candidates information topped with our consultant notes to get any additional information we believe is relevant to you.

Interview

We will run through full interview prep with our candidates before and on the day of their interview, we also provide a bespoke Peel Technical interview guide. We aim to guide our candidates through the interview process and make sure they are knowledgeable about the company and the job role, this will ensure the process runs smoothly for everyone.

Some of the roles we recruit for include:

Design Engineers

Installation/Commissioning engineers

Service/Maintenance engineers

Project Engineers

Site Supervisors

Project Managers

Estimators

Quantity Surveyors

Contracts Managers
